### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election with traverse of the election of species in the reply filed on October 22, 2004 is acknowledged. The traversal is on the ground(s) that Applicants are trying to protect the broad concept of the invention. This is not found persuasive because the various claimed details are too numerous and would create a serious burden on the part of the Office if they were all examined in the same application.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 6, 7, 12-18, and 22-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 22, 2004.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10, 11, and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saperstein et al in view of Redfern et al. Saperstein et al discloses the claimed invention, including a docking station 68 or 69 remotely located from the primary heat exchanger 62. However, Saperstein et al does not disclose the recited docking station for receiving a container for objects to be cooled. Redfern et al teaches a refrigeration system including a remotely located container 10 for objects to be cooled. It would be obvious to provide Saperstein et al with a container as part of the docking

station 68 or 69, in view of Redfern et al, for the purpose of providing additional cooling for objects such as food items.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
